Accordingly, the invention defined in claims 1-13 is novel and is considered to involve an inventive step. The invention is industrially applicable.

Claims

1. A cup package made of a fibre-based material, comprising a cup (1) containing a packaged product (2) and a lid (6) closing the mouth of the cup, both the cup and the lid being **characterised** in that the cup (1) comprises a mantle (3) bent downward at the mouth (4) of the cup to form a collar (5) diverging from the mantle, and in that the lid (6) has a downwardly oriented rim (8), at which the lid is fixed to the collar by heat sealing.
2. A package as defined in claim 1, **characterised** in that the mantle (3) of the cup (1) is enlarged conically upwardly.
3. A package as defined in claim 1 or 2, **characterised** in that the cup collar (5) and the lid rim (8) are enlarged conically downwardly.
4. A package as defined in any of the preceding claims, **characterised** in that the cup (1) is made from polymer-coated board (15) with at least the inner surface of the cup mantle (3) and the outer surface of the collar (5) being polymer coated.
5. A package as defined in any of the preceding claims, **characterised** in that the lid (6) has been formed of a polymer-coated board (15) with at least the inner surface of the lid being polymer-coated.
6. A package as defined in claims 4 and 5, **characterised** in that the polymer coating of the board (15) comprises an inner oxygen barrier layer (16) and an outer heat-sealing layer (17).
7. A package as defined in any of the preceding claims, **characterised** in that the lid (6) comprises at its centre a recess (14) defined by a conical surface (13) and nested with the cup (1) so that the friction and/or compression between the cup mantle (3) and the opposite conical surfaces of the lid recess retain the lid in position in the reclosed package.
8. A package as defined in any of the preceding claims, **characterised** in that a recess (14) has been formed at the centre of the lid (6) for receiving the bottom of the package on top as the packages are piled.
